Protection Table

Protection Method	Risk	Mall System
Use strong passwords and enable Multi-Factor Authentication (MFA).	Weak passwords may allow unauthorized access to payment information.	Payment System
Restrict access to authorized staff only and use secure administrator passwords.	Unauthorized users may access security cameras or disable them.	CCTV System
Install antivirus software and keep the operating system updated regularly.	Malware or viruses may steal important company data.	Employee Computers

Employee Security Tips

Employees play an important role in protecting Future Mall systems. The following security practices should always be followed:

1. Use Strong Passwords

Create strong passwords using uppercase letters, lowercase letters, numbers, and special characters. Never share your password with anyone.

2. Be Careful with Emails

Do not open email attachments or click on links from unknown or suspicious senders because they may contain malware or phishing attacks.

3. Lock Your Computer

Always lock your computer before leaving your desk to prevent unauthorized access to company information.

FUTURE MALL

CYBER SECURITY AWARENESS

Protect Our Systems

- ✓ Use Strong Passwords
- ✓ Never Open Suspicious Emails
- ✓ Lock Your Computer Before Leaving

Stay Safe – Protect Our Data

Conclusion

Cybersecurity is essential for protecting Future Mall systems, employee devices, and customer information.

By using strong passwords, protecting computers from malware, and increasing employee awareness, Future Mall can reduce security risks and maintain a safe working environment.
